Charter.

An Act for Incorporating the Trustees of Hampden-Sydney.

[MAY, 1783.]

I. WHEREAS it is represented to the present General Assembly, that an Academy has been founded in the county of Prince Edward, and which hath been supported by the generous donations of a few public-spirited citizens for several years past; but that, in order to make the advantages arising therefrom more permanent and diffusive, certain privileges are essentially necessary for conducting the same in future to greater advantage; and this Assembly, warmly impressed with the important advantages arising to every free state by diffusing useful knowledge amongst its citizens, and desirous of giving their patronage and support to such seminaries of learning as may appear to them calculated to promote this great object:

II. *Do hereby enact*, That from and after the passing of this Act, the said Academy shall obtain the name and be called the "College of Hampden-Sydney," and that the Rev. John Blair Smith, Patrick Henry, William Cabell, Senior, Paul Carrington, Robert Lawson, James Madison, John Nash, Nathaniel Venable, Everard Meade, Joel Watkins, James Venable, Francis Watkins, John Morton, William Morton, Thos. Reade, William Booker, Thomas Scott, Senior, James Allen, Samuel Woodson Venable, Joseph Parke, Richard Foster, Peter Johnston, the Rev. Archibald McRoberts, and their successors, are hereby constituted a body politic and corporate, by the name of the "President and Trustees of Hampden-Sydney College," who shall have perpetual succession and a common seal; and that they and their successors, by the name aforesaid, shall be able and capable in law to possess, purchase, receive, and retain to them and their successors for ever, any lands, tenements, rents, goods, or chattels, of any kind whatsoever, which may have been given already, or shall in future be given or purchased by them, for the use of the said College, and the same to dispose of in whatsoever manner they shall adjudge most beneficial for the use thereof; and by the same name to sue and implead, be sued and

impleaded, answer and be answered, in all courts of law and equity, and from time to time, under their common seal, to make and establish such by-laws, rules and ordinances, not being contrary to the Constitution or laws of this Commonwealth, as by them shall be thought necessary for the good order and government of the professors, masters, and students of the said College.

III. *And be it further enacted*, That the said president and trustees, or any seven of them, shall have full power and authority to meet at such times as they shall think necessary for the examination of any candidates for literary degrees, and they are hereby empowered and authorized to confer those degrees on such students as in their opinion shall merit the same, in as ample a manner as any other college in America can do, and to grant testimonials thereof under their common seal, signed by the president and five of the trustees at least; and that the president and trustees, or any seven of them, are hereby authorized and required to meet at said College, on some day to be appointed by the president, on or before the first day of October next, and then and there to elect and commission, under their common seal, such professors and masters as they shall judge necessary for the purposes of the institution. And that, in order to preserve in the minds of the students that sacred love and attachment which they should ever bear to the principles of the present glorious revolution, the greatest care and caution shall be used in electing such professors and masters, to the end that no person shall be so elected unless the uniform tenor of his conduct manifests to the world his sincere affection for the liberty and independence of the United States of America.

IV. *And be it further enacted*, That the president and trustees, or any ten of them, shall elect by ballot a treasurer for the said College, who shall give bond and security, payable to the trustees and their successors, for the faithful discharge of the trust reposed in them; and shall, when required by the corporation, render an account of all monies, goods, and other chattels, received and expended by him on account of and for the use of said College; and on failure or refusal so to do, shall be subject to the like proceedings as are prescribed by law in the case of sheriffs failing to account for and pay into the treasury the public taxes on their hands.

V. *And be it further enacted*, That the said trustees, or a majority of them, shall have power to remove or suspend the president, or any or all the masters, at any time, on cause shown, and to supply the vacancy occasioned by such removal from office; and upon the death,

resignation, or refusal to act, of the president or any of the trustees, or when there shall be a vacancy in any of the professorships, it shall be lawful for the remaining trustees, or a majority of them, to supply the same by new elections. It shall also be lawful for the president, or, in case of death, resignation, or refusal in him to act, the professors and masters for the time being, or a majority of them, to call a meeting of the trustees, when he or they (as the case may be) shall see cause so to do. *Provided, nevertheless,* That the president and trustees, before they enter upon the execution of the trust reposed on them by this act, shall severally take the following oath or affirmation, to be administered by a justice of the peace of the said county of Prince Edward, and by him certified to the court of the said county, there to be recorded; that is to say: "I, A. B., do swear (or affirm) that I will, to the best of my skill and judgment, faithfully and truly discharge the duties required of me by the 'Act for Incorporating the Trustees of Hampden-Sydney,' without favor, objection, or partiality. So help me God." And that the clerk of the said court, for entering the same, shall receive of the trustees the sum of one Spanish milled dollar.

Essays.

Evidences of Christianity—Fisher's Grounds of Theistic and Christian Belief.

Certain alterations may be made in the "Course of Study," as given above, by means of courses in German, French, and other elective studies, for which see "Degrees," page 31, and the individual departments.

Moral Philosophy.

The studies of this department are confined to the Junior and Senior Classes. They include Psychology, Ethics, and the History of Philosophy. The compulsory text-book for the Junior year is *Porter's Intellectual Science*; the text-books for elective study, *Mc Cosh on the Emotions* and *Locke on the Human Understanding*. The Senior Class will study *Porter's Elements of Moral Science*, *Schwegler's History of Philosophy* (elective), and *Guizot's History of Civilization* (elective).

Essays will be required of both classes during each term, and a Philosophical Seminarium will be held weekly for twelve weeks with the Senior Class during the second term.

Biblical Studies.

The object of this course is to give our students such a connected view of the facts of the Old and New Testament History, and of the nations with whom the chosen people were providentially connected, that they will be intelligent readers of the Bible and of current literature, and at the same time to furnish them with such proofs of the authenticity and credibility of the Scriptures as will fortify them against the materialistic and skeptical tendencies of the age. Proficiency in this department is necessary to the attainment of any college degree, and every student is required to attend one of its classes. One recitation a week will be held with each class throughout the course. The text-books are the Bible, Smith's Old and New Testament Histories, and Fisher's Grounds of Theistic and Christian Belief.

Mathematics.

FRESHMAN CLASS.

Candidates for admission to the Freshman Class are expected to have a thorough knowledge of Arithmetic; and it is very desirable that they should have some acquaintance with Algebra and Plane Geometry also. The class recites five times a week. The subjects taught are Algebra and Plane Geometry.

TEXT-BOOKS.—Wentworth's Complete Algebra, Wentworth's New Plane and Solid Geometry.

SOPHOMORE CLASS.

The Sophomore Class recites five times a week. The subjects taught are Algebra (completed), Elements of the Theory of Equa-

tions, Solid Geometry, Plane Trigonometry, Spherical Trigonometry, Land Surveying.

TEXT-BOOKS.—Wentworth's Complete Algebra, Wentworth's Geometry, Wentworth's Trigonometry, Wentworth's Surveying, Wentworth and Hill's Five Place tables

JUNIOR CLASS.

The Junior Class (elective) recites three times a week. The subjects taught are Plane Analytical Geometry and Differential Calculus.

TEXT-BOOKS.—Wentworth's Analytic Geometry; Rice and Johnson's Differential Calculus (abridged edition).

SENIOR CLASS.

The Senior Class (elective) recites twice a week. The time is devoted to the study of Analytical Geometry of Three Dimensions and Integral Calculus.

TEXT-BOOKS.—Wentworth's Analytic Geometry, Venable's Notes on Solid Geometry; Johnson's Integral Calculus.

The careful, systematic study of the text-books is supplemented, when necessary, by explanatory lectures, and the progress of the student is tested by requiring the solution of original problems related to the work of the class-room.

Course of Instruction in Latin.

FRESHMAN CLASS.

Candidates for admission to the Freshman Class are expected to have a good acquaintance with the forms of Declension and Conjugation, and with the leading rules of Syntax, as laid down in some grammar arranged for beginners, as Bingham's. They are expected also to have such facility in translating Latin prose into English as may be assumed, in ordinary cases, to be the result of two years' practice in the exercise, at the age of, say, fourteen to sixteen.

The Freshman Class will be engaged during the first half-session on the first part of McCabe's Bingham's Latin Grammar; and on one of the Books of Cæsar's Commentaries *de Bello Civili*.

During the second half-session this class will continue the study of Bingham's Grammar, including the Prosody, and will read one of the Books of Virgil's *Æneid*, or selections from Ovid's *Metamorpho-*

ses (chiefly for scanning), and three of Cicero's Orations against Catiline. Exercises are required in Latin prose composition.

EDITIONS OF TEXTS.

For Virgil and Cicero, the editions of Allen & Greenough are recommended; for Cæsar *de Bello Civili*, Perrin's edition.

SOPHOMORE CLASS.

The Sophomore Class will read, during the first half-session, Cicero's Orations *pro Milone* or *pro Murena*, and *de Imperio Cn. Pompeii*, and will study the Syntax and Prosody of Bingham's Grammar. During the second half-session this class will read Selections from the Satires or Epistles of Horace, and the twenty-first or part of the twenty-second book of Livy. Exercises in the translation of English into Latin are furnished and required weekly throughout the year. In connection with these exercises, Zumpt's and Gildersleeve's Grammars are used.

EDITIONS OF TEXTS.

Chase's Edition of McLean's Horace, Allen & Greenough's Edition of Cicero, and Chase and Stuart's Edition of Livy, are recommended.

JUNIOR CLASS.

The Junior Class will read Tacitus' *Dialogus de Oratoribus*, and *Agricola*, or *Germania*, or Quintilian's Tenth Book, *Instit. Orat.*; and study the Syntax of Gildersleeve's Latin Grammar. Zumpt's Grammar is used in connection with weekly exercises of translations from English into Latin.

EDITIONS OF TEXTS.

For Tacitus, a Leipsic edition of the simple text is recommended; and for Quintilian, Bonnell's edition.

SENIOR CLASS.

The Senior Class will read two or three of the comedies of Terence, and if there is time, something of Juvenal. This class is expected to use Gildersleeve's and Zumpt's Grammar in private; and one-sixth of its time spent in the study of Latin is devoted to the writing of exercises.

The final examination for graduation embraces a review of the whole previous course, and includes an *extempore* Latin composition.

Greek.

Preparatory instruction in this course, when needed, is given by the Fellow, students with no previous knowledge of Greek being formed into a sub-Freshman Class. The text-book is Harper's Inductive Greek Method, and the first book of Xenophon's *Anabasis* is read. Special attention is given to Accent and Quantity.

Candidates for the Freshman Class will be examined on the work of the sub-Freshman Class, or the equivalent thereof.

FRESHMAN CLASS.

A working knowledge of the inflections of Attic prose and some readiness in translating the *Anabasis* are prerequisites to entering this class. During the year the reading of the *Anabasis* will be continued, one book being read in class and one as parallel. The accidence will be thoroughly reviewed and the Syntax studied and made familiar by illustrative sentences and by exercises based on the parallel reading. The Geography of Greece is studied during this year, and Greek History from its beginnings to the period of the Athenian supremacy. The class meets four times a week.

SOPHOMORE CLASS.

Special study of the irregular verbs, as also of word-formation, forms a part of the work of this class. The Syntax is now studied topically, and exercises are required every week. Two books of the *Odyssey* are read, and portions of the *Hellenica* or *Cyropædia*. The study of the History is continued to the Age of Alexander. This class also meets four times a week. Hogue's *Irregular Verbs of Attic Prose* will be used along with the Grammar.

JUNIOR CLASS.

The regular Junior Class, which meets twice a week, reads Lysias and Demosthenes, and makes a special study of the portions of Greek History connected with the orations assigned. During the second term a play of Sophocles or Euripides (the *Antigone* has been selected for the coming session) is read. The Syntax is reviewed and exercises in Attic prose written weekly.

The elective Junior Class, which meets once a week, reads two books of the *Iliad* and portions of Herodotus, and writes exercises fortnightly.

SENIOR CLASS.

In this class, which meets twice a week, from September till the course ends with the first term, the forms and syntax being previously made familiar, long readings are given in Plato and in Demosthenes, and exercises, prepared (as also in the elective Junior) with a view to illustrating the nicer use of the Greek particles, are written every week.

The examination required of this class covers the whole course prescribed for this department, exclusive of the work of the elective Junior Class.

Allen-Hadley's Greek Grammar is used throughout the course, supplemented in the Junior and Senior years by the new edition of Goodwin's Moods and Tenses.

Prosody is taught only so far as the readings in the Epic and Dramatic poetry make it applicable. Practice in sight-reading is begun in the Freshman Class and continued throughout the subsequent course.

The Lexicon used in all classes is the seventh edition of Liddell and Scott.

Physical Science

Is taught in the Junior and Senior Classes. The attention of the Junior Class is first given to a consideration of the general properties of matter, and of the forces manifested in cohesion, adhesion, capillarity, endosmose, crystallography, etc.

The subject of HEAT is then taken up, and studied carefully and quite fully. Its intimate relations to other modifications of motion and force are impressed upon the attention. Light is studied so far as is thought useful before entering upon the study of Chemistry. Electricity in its various modifications, and with its many useful applications, next occupies the attention of the class. Theoretical Chemistry, Inorganic and Organic Chemistry, Physiology and Hygiene, and Agricultural Chemistry are studied in the order given. The subjects are taught both by text-books and by lectures, and illustrated by experiments. Opportunities of exhibiting and impressing upon the attention the useful applications of Chemistry are improved as far as possible.

The Senior Class enters upon the study of Mechanics, including the Laws of Motion and the operation of the various forces of nature,

as manifested in solids, liquids, and gases. The subject of vibrations and undulations is considered by way of preparation for the study of Acoustics and Optics, which latter is dwelt upon at much greater length and with much more particularity than could be done in the Junior Class.

Astronomy and Geology occupy the time of the class for the remainder of the session. With the use of the text-books the Professor makes such additions, suggestions, criticisms, or regular lectures as may seem important or necessary to the full elucidation and understanding of the subjects taught. Together with instruction in science, an effort is made to impart valuable information in regard to practical matters. In elective studies the Junior Class will devote its attention to Practical Chemistry and to Chemical Philosophy; the Senior to Mechanical Philosophy.

The text-books in this department are, in the Junior Class, Youman's *Class Book of Chemistry*, Remsen's *Introduction to the Study of Chemistry*, Martin's *Human Body (Briefer Course)*, Cooke's *Chemical Philosophy*, and Wagner's *Technology*. In the Senior Class, Ganot's *Physics*, Young's *Astronomy*, Geikie's *Class Book of Geology*, and Chute's *Practical Physics*.

German Course.

The course of instruction in German is arranged so as to be completed in two years. The nature of the instruction is indicated by the books which appear in tabular statement. Translations into German during the first year are oral; during the second year the same are to be oral and written.

TEXT-BOOKS.—First Year. — *Sheldon's Short German Grammar*; *Whitney's German Grammar*; *Whitney's German Reader*.

Second Year.—*Whitney's German Grammar*; *Bodenstedt's Translation of "Hamlet"*; *Freytag's "Die Journalisten"*; or *Schiller's "Jungfrau von Orleans."*

Heath's Dictionary is recommended. Students advanced as far as the second year will find advantage in consulting *Heyse's Schulgrammatik*.

French Course.

The course in French is completed in two years. During the first, practice in pronunciation is insisted upon and a mastery of the irreg-

ular verbs required, as well as familiarity with the general accidence. Selections from the simpler classics are read, and exercises in writing the language form a part of the work assigned for each week.

During the second year the more difficult points of Syntax are taught and passages prepared for rendering into French, to supplement the exercises found in the Grammar. Masterpieces from the dramatists, historians, etc., are read in class or in private. Together with the outlines of the literature are studied monographs of the more important divisions of the subject, as the Progress of Comedy or the history of the Romantic Movement of the present century.

TEXT-BOOKS.—First Year.—*Whitney's French Grammar*; *De Maître's Le Lépreux de la Cité d'Aoste*; *Sand's La Mareau Diable*.

Second Year.—*Whitney's Grammar*; *Warren's Primer of French Literature*; *Racine's "Andromaque,"* *Molière's "Les Précieuses Ridicules,"* *Sainte Beuve's "Causeries du Lundi"* (selections).

English Language and Literature.

The History of the English Language is traced from its earliest forms to the present, and its development is illustrated by the interpretation of selections from different periods and by exercises in Etymology.

The study of English Literature is begun with the Freshman Class and continued through the entire college course. During the first two years an attempt is made to familiarize the student with a general outline of the scope and progress of our literature; in the Junior and Senior Classes special topics are taken up and treated historically. Selections from representative authors are read with each class, and a prescribed course of private reading is required from every student.

Compositions or exercises are required from the Freshman Class weekly; from the Sophomore Class fortnightly. The Junior and Senior Classes write critical essays. Weekly exercises in Forensics during the Freshman and Sophomore years form a part of this course.

FRESHMAN CLASS.

This class meets three times a week, and every new student not thoroughly drilled in the subjects taught is expected to attend. The course of study comprises: Higher English Grammar, the Analysis of

Sentences, Pronunciation, and the principles of Rhetoric and Composition. The study of English Literature is begun.

SOPHOMORE CLASS.

This class meets twice a week, and its main work deals with the historical study of the English Language. Selections from the prose of Ælfred and of Ælfric are interpreted. Certain concluding principles of Rhetoric and Composition are considered, and the study of English Literature is continued.

JUNIOR CLASS.

This class meets three times a week. Its chief feature is the study of English verse. The course comprises: History of Old and Middle English Literature, with interpretation of the *Judith* and of Chaucer; History of the English Drama, with special study of Shakspeare; English Epic and Lyric Poetry, with selections; the study of English metres.

SENIOR CLASS.

The course in English Language and Literature, as required for any of the degrees, is completed with the Junior year. A Senior Class has been added for those desiring more special work in this department. There will be formed two distinct sections, each meeting one hour weekly. The class in English Language will take up a more thorough study of English Historical Grammar, and will interpret *Beowulf* and selections from the Middle English period. The class in Literature will discuss the History of the English Novel, the Romantic Movement, and the Victorian Era, the course ending with a sketch of American Literature. A course of parallel reading is assigned.

TEXT-BOOKS FOR THIS CLASS. — Cook's Siever's Anglo-Saxon Grammar; Harrison and Sharp's *Beowulf*; Morris and Skeat's *Specimens of Early English*; Skeat's *Concise Etymological Dictionary*. The text-books in Literature will be hereafter indicated.

Historical and Political Science.

LOGIC AND POLITICAL ECONOMY.

These studies, which are required for all degrees, are confined to the Senior year, Logic occupying the first term and Political Economy the second. The course in Political Economy will be supplemented

by selections from the "Questions of the Day" series, and by other economic tracts.

HISTORY.

The course in History, which is an elective study, covers two years, there being one recitation a week each year. Special attention is paid to the History of England and to the Constitutional History of the United States. Each student is required to prepare an essay during the course of the year.

TEXT-BOOKS.—Green's Short History of the English People; Tait's Analysis; Johnston's American Politics; Sterne's Constitutional History.

Civil Engineering.

Civil Engineering is taught by the Professor of Mathematics to those few students who desire such instruction, provided their state of preparation is such as to warrant their entry on technical study with reasonable hope of success. Special fee for instruction in this course, \$25.

Commercial Course.

The Professor of Mathematics will give instruction in Book-keeping and Commercial Arithmetic. The purpose in view is to give a thorough knowledge of the Science of Accounts. The principles of Single and Double Entry Book-keeping are taught by practical exercises, illustrating all the various kinds of business transactions, and the student is made familiar with all business forms, such as Bills, Notes, Drafts, etc. Two recitations a week are held throughout the session.

TEXT-BOOKS.—Bryant & Stratton's Book-keeping, Packard's New Commercial Arithmetic.

The studies of this course are not required for any of the degrees given.

MISCELLANEOUS.

General Remarks.

At present each class will recite once a week on Bible Studies.

The Freshman Class will recite five times a week on Mathematics, four times on Greek, and three times on Latin and English each.

The Sophomore Class will recite five times a week on Mathematics, four times on Latin and Greek each, and twice on English.

The Junior Class will recite three times a week on Physical Science and on English, and twice a week on Moral Philosophy, on Latin, and on Greek.

The Senior Class will recite twice a week on Moral Philosophy, Logic, Political Economy, and four times on Physical Science.

In the four classes, all of the studies above mentioned are necessary for the regular A. B. course, with the partial exception of Latin and Greek, either of which may alternate with French and German, according to a prescribed method, explained under the head of Degrees, page 31.

In Elective studies, the Junior Class will recite three times a week on Mathematics, and once a week respectively on Moral Philosophy, Physical Science, Latin, Greek, and History; while the Senior Class will recite twice a week on Mathematics, Latin, and Greek, and once a week on Moral Philosophy, Physical Science, and History.

Hampden-Sidney professes to be a college merely, and not a university. She retains a curriculum of study which long and varied experience has proved to be best adapted to effect a *liberal* education, as distinguished from education of a purely business or professional character. Students are prepared for the professional schools, whether secular or religious, of the very highest grade, or fitted for the proper discharge of the duties of enlightened citizens. Believing that the culture of all the mental faculties, designed to be accomplished, is best effected by the complete and thorough mastery of what is taught, the catalogue of text-books is not so extended as to necessitate the hasty, superficial and imperfect study and acquisition of the contents

of books on a vast number of subjects, however valuable and important in themselves.

As everything cannot be taught within four years to youth of ordinary abilities, the attempt to do so is not made; but rather to do well and thoroughly what is professed to be done.

Admission.

Candidates for admission into the College are examined by the Faculty, and placed in the class which they are prepared to enter. Candidates for admission into any particular class must stand an examination on *all* the course previously pursued by the class. In *all* cases the candidate is required to present satisfactory testimonials as to his moral character and standing in the institution which he *last attended*.

Students desiring to pursue a particular branch of study are permitted to enter any class in College for which they are found prepared, subject, however, to the direction of the Faculty in the amount of study required, which shall in all cases be equal to that of regular students. Applicants for admission should be present for examination on Tuesday before the session opens, or on the Tuesday before it closes.

Applicants for the Freshman Class found deficient in Latin, in Greek, or in Mathematics, will be instructed by the Fellow in the particular study in which they are unprepared.

Medical Attendance.

The health and physical welfare of the students will be under the constant care of the College physician.

It is hoped that the friends of the College will come up to the help of those who have on hand measures to secure a well-appointed College Gymnasium. This will be under the supervision of the physician, who, after careful examination of each student, will be able to advise with reference to physical exercise, so that imprudence may be avoided, and constitutional defect, as far as possible, remedied.

A fee of \$3.00 is required of each student, and this will entitle him to the constant care and advice of the physician during the session without further charge.

Religious Exercises.

Students are required to attend prayers in the Chapel, Bible-class on Sunday, and Church in such place as their parents or guardians

shall request; or, without such request, in the place appointed by the Faculty. The students, for the most part, belong to the Young Men's Christian Association, and the several classes have weekly prayer-meetings in addition to the weekly services conducted by the Y. M. C. A. in the chapel.

Monthly Circulars.

Each Professor keeps a daily record of the attendance and recitations of the members of his classes, and at the end of every month a statement of the average standing in scholarship, the number of absences from recitations, chapel and church, and of the failure to recite, together with any improper deportment requiring particular notice, is transmitted to the parent or guardian of each student in the institution.

Examinations.

There are two examinations of all the classes, one in the middle of the session, and another at the close, conducted by each Professor in his own department. These examinations are usually written, but may be either oral or written, or both combined, and are designed to test thoroughly each student's knowledge of the studies of the session. The classes are divided into four divisions or grades, according to the results of the examination, and their sessional standing. Those in the first grade are announced at Commencement as distinguished. Those in the second grade are sustained and permitted to advance with the class, whilst those in the third grade cannot advance until they have been sustained on re-examination. Those in the fourth grade are not entitled to re-examination, which, however, in certain cases, may be granted by the Professor in charge.

The members of the Senior Class are examined on the studies of the course three weeks before Commencement.

Public Exhibitions.

Students of the Junior and Senior Classes deliver original orations in the chapel at intervals during the session, and representatives from each of the Literary Societies, together with the members of the Junior Class, on the 22nd of February.

Vacation and Commencement.

Commencement occurs annually on the Thursday following the third Tuesday in June. The vacation follows the annual Commencement, and continues until the Thursday after the second Tuesday of September.

Every student is expected to enter punctually on the first day of the session, or present to the Faculty satisfactory reasons for absence. Parents and guardians cannot be too careful in seeing that this rule is observed; for the loss of a few days at the beginning of the session is almost invariably followed by a loss of grade in class, and always subjects the student to hurried and embarrassed study. Parents and guardians are also earnestly requested not to permit their sons or wards to be absent during the College term.

Degrees.

I. BACHELOR OF ARTS.

1. This degree is conferred upon those who complete the following course, embracing (1), *All* the studies of the Freshman and Sophomore Classes; then (2), *All* of the *compulsory* studies of the Junior and Senior Classes, to-wit: Moral Philosophy (including Bible Studies), Physics, Latin, Greek, English, and Logic and Political Economy, and (3), Either *all* the Mathematics of these two classes, or any *two* of the other *elective* studies, in both the Junior and Senior years; and

2. Upon those who modify the course thus indicated by substituting French and German for *one* of the Ancient Languages, in which case *one* elective study must be taken in the Junior and Senior years; or, also,

3. Upon those who may prefer to modify the same course by dropping either Latin or Greek at the close of the Sophomore year, and substituting either French or German, in which case again *one* elective study must be taken in the Junior and Senior years.

II. BACHELOR OF SCIENCE.

For this degree it is required to take *full* courses in Moral Philosophy, Physical Science, Mathematics (including the electives in each), French, German, English, and Logic and Political Economy.

III. BACHELOR OF LITERATURE.

The requirements for this degree are *full* courses in Moral Philosophy, Latin, Greek, French, German, English, and Logic and Political Economy, including the electives in each of these departments, and to pursue and complete the Mathematics through the Sophomore year, and Physical Science through the Junior year.

IV. MASTER OF ARTS.

For this degree *full* courses, including the electives, must be taken in Moral Philosophy, Physical Science, Mathematics, Latin, Greek, English, Logic and Political Economy, History, French and German.

The course in Biblical Studies must be taken in order to attain *any one* of the degrees given.

Expenses.

Tuition for the year,	\$60 00
Room rent for the year,	12 00
Fee for contingent expenses,	7 00
Matriculation fee,	10 00
Deposit (which is returned if no damage is done),	5 00
Board, \$2 50 per week, half in advance in Sept. and Jan.,	100 00
Washing, per month, \$1.25,	12 00
Fee for medical attention,	3 00
Wood, \$1.50 to \$2.50 per cord, variable, say,	10 00

Table board in private families, from \$12 to \$15 per month.

Students furnish their own rooms, but a comfortable outfit can be had at small cost.

Members of the Junior Class in Chemistry pay a fee of \$7.

Students who enter on the scholarships pay no tuition fees, but are liable for all the other charges, *which, as well as the tuition fees, must be paid in advance.* The incidental expenses will depend upon the habits of the student and the allowance from home. There is no more fruitful source of injury to the student than too large a supply of pocket-money.

Candidates for the Gospel ministry pay tuition fees, or not, as they prefer. The Faculty may remit all charges for tuition to sons of ministers of the Gospel, whenever it is desirable to do so.

Scholarships.

PRIZE SCHOLARSHIPS.—Two prize scholarships, one established by Mr. H. H. Houston, of Philadelphia, Pa., for the best general scholarship in the Freshman Class, the other by Mr. George E. Tuckett, of Hamilton, Canada, for the Sophomore Class, entitles the recipients to free tuition for the next succeeding year.

FREE SCHOLARSHIPS.—By the liberality of its leading citizens a scholarship has been founded for Petersburg, Va., which entitles all

students from that city to attend College free of tuition, matriculation and contingent fees, and room rent.

The Faculty has also at its disposal, through the beneficence of Capt. S. W. Venable, of Petersburg, scholarships for four young men from Southside Virginia, and another, founded by gentlemen in New York City, which entitle the holders to the same privileges as the Petersburg scholarship, and are intended only for such students as need help in order to obtain an education.

Applications for the use of these, with certificates as to character and preparation, should be forwarded to the President of the College, as far as practicable, by June 12th.

Capt. R. B. Moorman, of Roanoke, Va., and Wm. Cameron, Esq., of Petersburg, Va., have also founded scholarships with the same privileges attached.

It is probable that several other scholarships will be available before the beginning of the next session, and it is hoped that, ere long, arrangements may be made to offer free collegiate advantages to all young men in Virginia, who, having means barely adequate to the payment of their board and personal expenses, stand in need of just such assistance.

Halls and Libraries.

The halls of the Literary Societies are fitted up with great taste and neatness, and the libraries, containing about 3,500 volumes each, have been selected with care.

The Memorial Hall.

This building, for chapel, lecture-rooms, and halls for the Literary Societies, is nearing completion, and will be ready for occupancy at the beginning of the next session. It is situated on the campus, is built of pressed brick with brown-stone trimmings, and is in every respect a handsome and modern structure. It will be an important addition to the comfort and convenience of both professors and students, and will leave much space in the College for the accommodation of a larger number of students.

Location, Remarks, &c.

HAMPDEN-SIDNEY COLLEGE is located in Prince Edward County, Va., and is reached by daily stage from Farmville, which is on the Southside portion of the Norfolk and Western Railroad. Connection

with the telegraphic system of the country is made by telephone from the College to Farmville. The post office is a money order office. The locality is proverbially one of the most healthful in Virginia. Union Theological Seminary is in its immediate vicinity, and the students of either institution have access to the lecture-rooms and libraries of the other, free of charge. The College is surrounded by a community distinguished for intelligence, morality, and piety, in the families of which students may enjoy all the social advantages consistent with a life of study. Its quiet situation in the country, removed from the bustle of life, and from the temptations incident to town or city, associated with the above-named advantages, renders this College one of the most desirable retreats to every student who aims to secure the thorough culture of his mind and heart, and the formation of correct ideas.
